

figS5 — Event score, reliability, and probabilistic diagnostics

NOT REPORTED for the 2021–2023 held-out window

Requires the SI08 probability family (coverage, pinball, Brier, log loss, AUROC/AUPRC, ECE, calibration slope/intercept, station-balanced reliability bins). Not computed for 2021–2023

(paper Table 4.9: not reported). The development-period probability diagnostics (paper section 4.5) stand as the only probability evidence in this paper.
