

Held-out 2021–2023 · station-median metrics over the common forecast keys

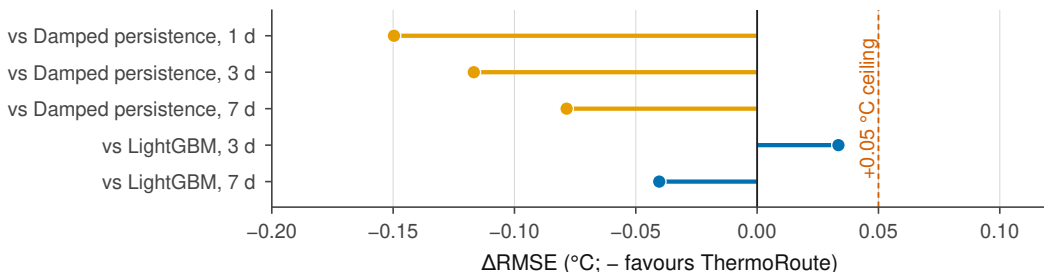

(a) Reference ladder

(b) Six primary models

(c) Paired Δ RMSE, ThermoRoute minus reference

In (a) and (b) “Damped” is damped persistence. Δ RMSE in (c) is the unweighted station median of paired per-station differences over the 116 reportable stations; clustered intervals, win rates, and Holm-adjusted p-values are in Table 4.6.
