

(a) 120 sites, 4 whole-region folds

(b) Temporal partitions

2006–2015
Training

2016–17 2018 2019–20 2021–23
Validation Development Held-out test

(c) Evaluation tasks

Known-site
site trains; identity used

Random held-site
random folds; identity removed

Whole-region
HUC2 folds; identity removed

(d) Issue-time information boundary

Predictors dated $\leq$ issue time t local WT history allowed

Target observed at $t + h$ no future weather

All models scored on identical keys preprocessing fitted on ≤ 2020
